B2B PURCHASING PLATFORM

Ordering frames has never been so simple!
All you need to place an order is your phone or computer.

#TIMEFORCHANGE

NEW PRODUCTS

CHAMELEON FRAME

A frame with doming surface – flexible, transparent resin layer with a three-dimensional effect that protects against harmful weather conditions. Applied „chameleon" foil shimmers in many colors depending on the angle of the light – from deep purples to shades of green and blue.

3D FRAMES WITH # SYMBOL

Raised hashtag technology is ours – the rest of the frame surface is entirely up to you!
No idea? No problem – you can use the available designs.
You'll find here popular car brands such as Audi, BMW, Škoda, Toyota, and others...

UNIVERSAL 4D FRAMES

A 4D frame with universal digital print and slogans such as Be Active, Travel, Power – perfect for sports and activity enthusiasts. This unique frame also allows identification with a city or country.

#UTALSTYLE

STANDARD FRAME

- frame's dimensions: 520x132 mm
- material: polypropylene (base), polystyrene (slat)
- highly durable plastic used for production. The frame is highly resistant to extreme temperatures (from -40°C to +80°C).
- A system of springs prevents vibrations of the license plate and a 19 mm wide slat protects it from dislodging and theft

# INTENSE BLACK FRAME PS AND PP/PS

INTEGRATED PS

- frame's dimensions: 520x175 mm
- material: polystyrene
- easy removal of the set from the box thanks to the integrated slat and base
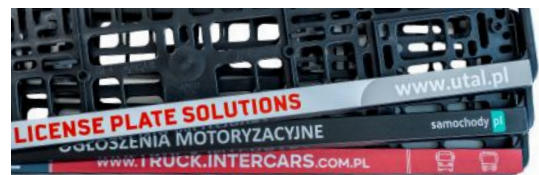

NON-INTEGRATED PP/PS

- frame's dimensions: 527.5x133 mm (base)
- material: polypropylene (base), polystyrene (slat)
- The Intense pp/ps frame combines a wide, polystyrene slat with a flexible base made from polypropylene. The flexible base makes it easier to install the frame on the vehicle and the wide slat makes the ad more pronounced and legible.

ECOLOGY

For years, UTAL has been committed to innovation and responsible manufacturing. With the environment in mind, we introduce solutions that help reduce the impact of our operations. Our license plate frames are printed using advanced UV technology, delivering outstanding durability and visual quality, but without the need for environmentally harmful paints and solvents. As a result, our frames are not only a solid product, but also a choice that supports an eco-friendly approach to manufacturing.
